(54) UNSATURATED POLYESTER RESIN COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an unsaturated polyester resin composition which contains a vinyl ester resin and can be easily thickened controllably.

SOLUTION: The composition comprises as the essential components an unsaturated polyester resin A, a vinyl ester resin B, and a polymerizable monomer C. The resin B is obtained by reacting a bisphenol epoxy compound having two or more epoxy groups per molecule with an unsaturated monocarboxylic acid and then effecting an addition reaction between secondary hydroxyl groups present in the skeleton of the epoxy compound and/or secondary hydroxyl groups generated by the reaction and a carboxylic anhydride.
